Art Unit: 1774

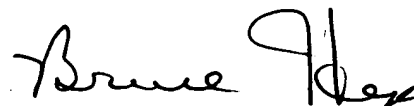

Claims 1, 2, 4-9 and 45-58 are rejected under 35 USC 112 (second paragraph) for the reasons set forth below:

A. Absent an underlying substrate or support, the "article" embodiment is indefinite since it is actually a composition; and

B. The "composition" embodiment cannot be overprinted. If one element is overprinted on another element, the resulting product is an article, not a composition.

Claims 45, 46, 49-53 and 56-58 are rejected under 35 U.S.C. 103(a) as being unpatentable over the patent to Morgan for the reasons of record.

Applicants' arguments are not commensurate in scope with their claim language. In particular, the claims are silent with respect to specific amounts of chroman. Since no reaction is 100 % complete, some unreacted chroman will be present. Finally, it is noted that the chroan compound can comprise up to 10 % of the Morgan imaging layer.
